

# 21 STEEP ANALYSIS EXAMPLE

**Risk Scenario:**

The physical safety of staff is threatened.

SOCIAL	TECHNOLOGICAL	ENVIRONMENTAL	ECONOMIC	POLITICAL
The society we work in holds extremely conservative values about the topic we work on.	Our government can access our private communications and does not approve of the topic or target group we work with.	The infrastructure (roads, buildings, etc.) where we work are not well maintained.	Lack of job opportunities affects our target group.	The government disapproves of the topic we work on and feels threatened by the work we do.
The target group we work with are seen as a threat by the rest of society.	We work in an area where people have access to weapons.	The resources we need to do our work are in the power of those who disapprove of our work ( e.g unfriendly government, rebel militia, etc.)	Local poverty prevents us from gathering enough local resources to support our target group and we must get funding from foreign governments.	The government is unstable and cannot provide basic security measures for citizens
We are funded by a foreign country's government, and this is not accepted by our community.
